

Table of Contents

1. Introducing Excel	1
1.1 Arithmetic Series	1
1.2 Triangular Numbers	4
Named Variables	8
1.3 Geometric Series	10
Plotting a Graph in Excel	11
1.4 Fibonacci Sequence	13
The Golden Rectangle	13
Fibonacci Spiral	16
Repeated Fraction	17
Fibonacci Rabbits	18
Binet's Formula	18
1.5 Computing n^2 in Your Head	21
1.6 A Square Root Algorithm	22
1.7 Summary	24
2. Triangles and Circles	25
2.1 Pythagorean Theorem	25
2.2 Trigonometric Functions	27
2.3 Circumference of a Circle	29
2.4 The Area of a Triangle	31
2.5 The Area of a Circle	33
2.6 The Acreage of a Plot of Land	34
Excel Solution	35
2.7 Euclid's Elements	36
Other Circle Theorems	40
2.8 Summary	42
3. Introducing MATLAB	43
3.1 Vectors	43
Vector Addition	44
Vector Subtraction	45
Unit Vectors and Coordinate Systems	46
Addition of Vectors by Components	48
Three-Dimensional Vectors	49
Direction Cosines	50
3.2 MATLAB Vectors	51
3.3 Dot Product	53
Dot Product and Vector Components	55
3.4 MATLAB Dot Product	56
3.5 Cross Product	59

Definition of the Cross Product	60
Distributive Law for the Cross Product	60
Cross Product and Vector Components	61
Determinant	63
Associative Law	64
Cross Product Geometric Properties	65
Cross Product and Determinant in MATLAB	66
3.6 MATLAB .m File	68
3.7 Solving Linear Equations	71
MATLAB Matrix Inverse	75
3.8 Airplane Problem	75
3.9 Summary	78
4. Slopes and Derivatives	79
4.1 Exponents and Logarithms	79
4.2 Finding the Slopes of the Logarithm Curves	84
4.3 Finding the Slopes of Exponential Curves	85
4.4 Finding Slope Curves using MATLAB	90
4.5 Car Velocity and Acceleration	94
4.6 Circular Functions	97
4.7 Power Derivative	99
4.8 Chain Rule	102
4.9 Summary	105
5. Areas and Integrals	106
5.1 Calculating the Area Under a Curve with Excel	106
5.2 Area of a Quarter Circle	107
5.3 Areas of Sine and Cosine Waves	108
5.4 Areas of $1/x$ and $\ln x$	111
5.5 Area of e^x	114
5.6 Area of x^n	115
5.7 Calculating the Area Under a Curve with MATLAB	115
5.8 Car Velocity and Distance	118
5.9 Table of Derivatives and Integrals	120
5.10 Summary	121
6. Complex Numbers and Euler's Equation	122
6.1 The Square Root of -1	122
6.2 The Complex Plane	124
6.3 Euler's Equation	128
6.4 Sine and Cosine Waves	132
6.5 Trigonometric Identities	134
6.6 Logarithmic Spiral	138

6.7 Fractal Geometry	140
The Koch Curve	141
The Julia Set	142
Orbits of the Julia Set in Excel	148
The Mandelbrot Set	150
6.8 Summary	154
7. Curve Fitting	155
7.1 Linear Polynomials and Lines	156
Plotting a Line	157
7.2 The Pseudo-Inverse and Left Division Operator	160
7.3 Fitting Quadratic and Cubic Data	168
7.4 Fitting Exponential Data	172
Measuring Capacitance	174
Compound Interest	177
7.5 Infinite Series	179
Infinite Series of Trigonometric Functions	184
7.6 Measuring Phase in Sinusoidal Data	188
7.7 Why is Linear Regression Least Squares?	190
7.8 How Good is the Least Square Fit?	196
7.9 Multiple Linear Regression	199
7.10 Summary	203
8. Differentiation	204
8.1 The Product Rule	204
8.2 The Quotient Rule	208
8.3 Car Displacement and Velocity Derivatives	210
8.4 Implicit Differentiation	213
Related Rate Problems	214
8.5 Maxima and Minima	217
8.6 The Fundamental Theorem of Calculus	219
Exploring the Fundamental Theorem with Excel	219
Exploring Fundamental Theorem with MATLAB	226
8.7 Summary	230
9. Integration	231
9.1 Method of Substitution	231
9.2 Integration by parts	235
9.3 Area of a circle	240
9.4 Area Under the Gaussian Function	242
9.5 Volume of a Cone	243
9.6 Volumes in Rectangular Coordinates	245
9.7 Volumes in Cylindrical Coordinates	248
Volume of a Vase	249

Volume of a Cone	251
Volume of a Hemisphere	252
9.8 Volume and Areas in Spherical Coordinates	253
Volume and Area of a Sphere	255
Area of a Cone	256
9.9 Length of a Line	257
Catenary Curve	259
9.10 Gabriel's Horn	262
9.11 Summary	264
10. Electric Circuits and Mechanical Systems	265
10.1 Circuit Elements	265
Resistor	265
Voltage Sources	266
Capacitor	267
Inductor	268
10.2 RC Circuit	269
10.3 RL Circuit	273
10.4 RLC Circuit	275
10.5 Mass-Spring-Dashpot System	277
10.6 Sinusoidal Signals and Phasors	279
10.7 Impedance and Admittance	281
Capacitor	281
Inductor	283
10.8 RLC Circuit with an AC Source	284
10.9 Mass-Spring-Dashpot with a Forcing Function	288
10.10 Solution of the Differential Equation	293
Eigenvalues and Eigenvectors	294
The MATLAB Function eig(A)	299
Solving the System of Differential Equations	300
Special Cases for RLC Circuit	
and Mass-Spring-Dashpot	304
Case 1: Overdamped – Real Sink	305
Case 2: Underdamped – Spiral Sink	307
The Trace-Determinant Plane	309
Case 3: Undamped – Center	311
10.11 Summary	313
11. Solving Polynomial Equations	314
11.1 The Quadratic Equation	315
General Solution of the Quadratic Equation	319
Complex Roots	322
11.2 Solving Cubic Equations	323

11.3 Buoyancy	328
Appendix A: Heron's Formula for the Area of a Triangle	337
Appendix B: The Normal Distribution	340
Appendix C: Combinations and the Binomial Distribution	344
Index	353
